

Certificate of Participation

BRIDGE – Brilliant Innovation Through Digital Engagement
Digital Impact Day, 4 May 2022

A sustainable world is our only future.

The BRIDGE project is convinced **that students**, young professionals, hold many keys to this future and we are impressed by the original ideas presented at the end of our first Digital Impact Day. During the event you proved your skills in interdisciplinary and intercultural teamwork resulting in impactful solutions for the future. Your participation provided the curiosity and ingenuity needed for your team to complete the challenge successfully.
